

Specification MOS(A)/CV2296		SECURITY	
Issue 2 Dated 28. 4. 55		Specification	Valve
To be read in conjunction with K1001 & BS.448		UNCLASSIFIED	UNCLASSIFIED

Indicates a change.

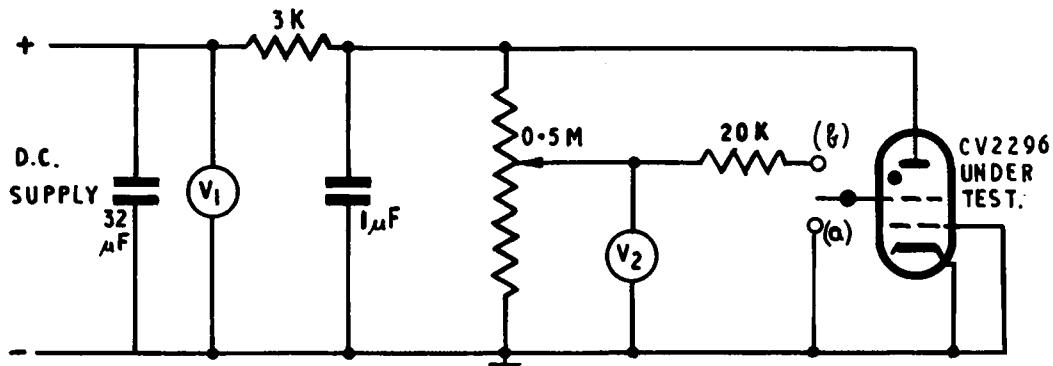

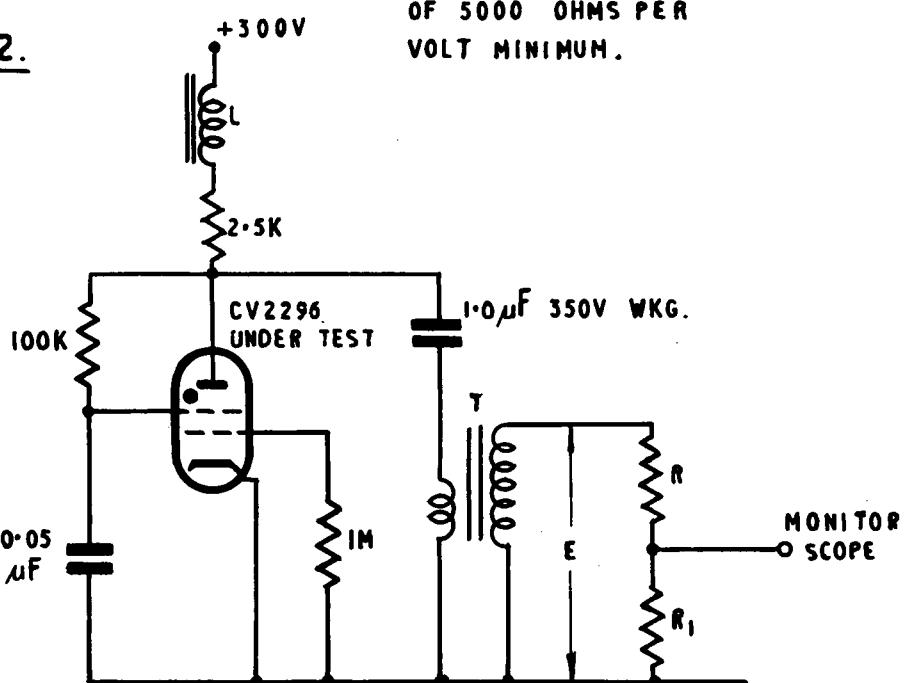

TYPE OF VALVE - Gas-filled Tetrode		MARKING																			
CATHODE - Cold		See K1001/4.																			
ENVELOPE - Glass - Unmetallised																					
PROTOTYPE - NSP2																					
RATING		BASE Octal BS.448 : B8-0																			
Max. Anode DC Voltage (V) 380 Min. Anode DC Voltage (V) 220 Max. Peak Anode Current (A) 250 Max. Mean Anode Current (mA) 40-100 Peak Inverse Anode Voltage (V) 350 Trigger Voltage (V) 80-130 Max. NOTES

- A. DC Supply Voltage.
- B. A minimum of 5 amps is necessary for the formation of an arc discharge with a tube drop of approximately 20 volts. If the main gap current is less than 5 amps peak, a glow discharge is likely to form with a 70 volt drop and result in excessive cathode dissipation.
- C. Limitation due to heating of cathode, dependent on peak current and duty cycle.
- D. For triggering between screen and grid.
- E. With control grid 80 - 130 volts negative with respect to screen grid.
- F. Less than 40 μ secs dependent on circuit conditions. With higher energy pulses the delay time can be considerably reduced.
- G. Negative with respect to screen voltage.

To be performed in addition to those applicable in K1001

Test Conditions	Test	Limits		No. Tested	Note
		Min.	Max.		
a With the valve operating in the test circuit shown in Fig. 1 on Page 4, and switch set to position (a), 330V DC shall be applied across the reservoir condenser.	<u>Anode-Screen Grid Breakdown Voltage (V₁)</u> (V)	330	-	100%	
b As for Test (a) but switch in position (b); 330V DC shall be applied across the reservoir condenser. The screen grid voltage shall be increased until the valve fires.	<u>Screen Grid Starting Potential</u> Screen grid breakdown potential measured just before conduction starts. (V)	80	130	100%	
c The valve shall be operated in the test circuit shown in Fig. 2 on Page 4.	Life (hrs)	300	-	TA
