ATTENTION - CONSTRUCTION NIGHTS -

The first 1992 club project is a Top Band, QRP Double
Sideband/CW, Transceiver. This project is primarily aimed at
the newcomer to construction. PCB's and components will be
available for purchase by members.

However, members and visitors who are not interested in
building this project are encouraged to bring along their own
projects either to progress them further or to
discuss/display them.

Suggestions for simple projects are required and
original designs will be very welcome.

***** ATTENTION *****

If you have any suggestions, or are able to give a talk on
any subject, no matter how brief, then please contact the
secretary as soon as possible. The BARC is YOUR club, so
PLEASE help support it!

***** THANK YOU, 73 de GOCCU *****
