700 PLUS
CALLS

**THE
BRISTOL
RADIO
AMATEUR
CALLBOOK**

JANUARY 1985

COMPILED and EDITED
BY G4SQQ and G8NNU

THE BRISTOL CALL BOOK

This book contains the names and addresses of licenced Amateurs in Bristol postal districts BS1 to BS21 inclusive, which covers approx 50% of the County of Avon.

The original concept of the Bristol Call Book was by G3ULJ in 1972, and the data was collected by G8EQP. Previous editions were prepared by G3JMY G6JUD and the present edition has been prepared by G8NNU and G4SQQ it includes all entries found in the R.S.G.B. 1984 Call Book with apologies for any inadvertently omitted.

THE BRISTOL ACTIVITY AWARD

As part of the "BRISTOL 600" Exhibition in 1973 the idea was proposed of a Bristol Activity Award which could be claimed by stations who had established a sufficient number of contacts with Amateur Radio Stations in the Bristol area. Full details of the Award are given in the rear pages of this edition.

THE CITY OF BRISTOL RSGB GROUP

The group is one of the oldest radio groups in the country, it is possible to trace it's beginning back to the year 1913 when it was known as the Bristol Wireless Association.

It has progressed through the years under several different headings ie 1924 Bristol & District Radio Society to 1931 when it changed the title to the Bristol RSGB Group.

Unfortunately some of the records were destroyed during the war but it is thought that the above dates are reasonably accurate.

During it's long history the group has been very active both in the local and national Amateur Radio scene and has included many eminent contributors amongst it's members.

The Group meet in the Queens Building, University of Bristol, on the last monday of each month if this date coincides with a Bank holiday then the meeting is brought forward a week.

A talk on one aspect of Amateur Radio is programmed for each meeting. Other activities sponsored by the group are two mobile picnics held in one of the local beauty spots, an Xmas party and finally the highspot of the years activities the organisation for the Longleat mobile rally held at Longleat Park home of the Marquis of Bath one of the Stately homes of England.

The rally which has now grown to be one of the most popular mobile rallies in the rally calendar attracted an estimated 14,000 visitors last year.

It is hoped that this years rally the 28th will be equally as popular on Sunday 30th June.

73

City and County of Bristol Group of the R.S.G.B.

This Award witnesses to the Endeavour and Active Participation in the World-Wide Hobby of Amateur Radio on the part of Radio Stations within Bristol to the satisfaction of the Awards Committee

Total points gained	on the Bands listed	Standard of this Award	Witnessed by	Date
Band	Mode	Points	Group Chairman	
Endorsements			Awards Manager	

THE BRISTOL ACTIVITY AWARD

The Certificate for this Award is a worthwhile addition to any radio shack. It is awarded to any station in any country which logs a sufficient number of contacts with Bristol station in postal districts BS1 - BS21 inclusive. Short wave listeners may also apply, subject to confirmation by a referee, or through submission of QSL cards. It is not necessary to be a member of the SGB.

Four points will be gained for each of the contacts made by radio. For the basic One Star Award, a minimum of 100 points are needed, and endorsements can be subsequently obtained for each additional 100 points. An endorsement can be requested for "Worked All Award Area" if contacts are made with all 21 postal districts. Bristol stations are asked to inform their contacts of the existence of the Award, and to pass on all relevant information, including postal district and points value for the contact and repeat it on their QSL card.

The Award is designed to promote amateur radio activity in the Bristol area. Each Bristol station may be contacted once only on each band, but Portable and mobile operation will be taken as separate from the base station contact, provided that the Bristol station is still operating within the prescribed postal district. Contact may also be made via repeaters or via satellites. In the case of Special Event Stations, Field days, or Club Stations within BS1-BS21, such contacts rate double the usual points allocation. When 100 (etc) points are known to have been accumulated the log extracts, under separate band headings, must be confirmed by at least one other amateur, and forwarded to the Bristol Activity Award Manager, G3JMY QTHR, together with the callsign and location of the station. Applications for endorsements will be issued with a new dated certificate.

Please note points can be claimed as follows for a contact with a Bristol Station.

Other Station	in Bristol	U.K.	outside U.K.
50m to 70cm	4	10	10
80cm & 13cm	5	10	50
100cm	25	+ 1 per Km	----->

FT203R

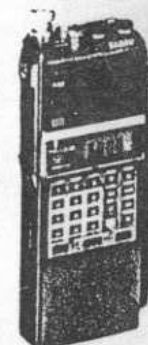

The FT203R is packed with a lightweight, high output design, case providing excellent protection with high durability for all hard working applications. The small size is made possible by using chip components, installed on the 'mother board' circuit board by automatic assembly robots. These 'through-hole' frequency selective units 5 kHz up to 10 kHz plus simplex or standard receiver shift selected by a switch on the top panel. Volume and Squelch controls are located on the top panel along with jacks for the antenna, BNC1 external microphone and speaker and PTT/D power switch. When used with the optional external YX2 Headset, the VOR system in the FT203R provides voice activated, transmit/receive switching, allowing the operator to have both hands completely free when mobile or walking. (As FT203R)

The top panel of the FT203R also includes an S/PD meter for monitoring of relative power output during transmissions and relative signal strength while receiving. (As FT203R)

The FTE 2 1750 Hz Tone Burst Generator, which is included as standard, can be activated manually by a button on the side of the FT203R. (As FT203R)

A choice of slide on Ni Cd packs or case for AA cells allows you to select the optimum power source for your needs. (As FT203R)

144 146 MHz - 10 KHz ± 5 KHz
Supply: 8.5 - 13V DC
IP's: 10 000 - 0.450 MHz
Selectivity: 2.8KHz @ -6dB (2.15K)

FT209R

The FT209R with two 4 bit CPU's and a silicon backed RAM offers features far beyond anything yet conceived in a portable mobile and lighter than any previous CPU controlled transceiver.

Ten memory channels allow storage of either standard +/- shifts or independent Tx and Rx frequencies for any shift or separate shifts on any channel, with touch key reverse or simplex on either frequency. Scanning capabilities include step-programmable full or partial band or memory bank scanning, calling channel, select memory of dial priority, scanning/monitoring, etc.

Battery life is greatly extended over standard powered monitoring, with Yaesu's programmable Power Saver System, which activates the receiver momentarily in programmable intervals.

Twelve soft rubber dual function keys provide greater control than ever, yet operation remains easy, the keypad is carefully arranged, color-coded, and keypad assisted, most common commands are one touch operations.

Fast LCD digits are complemented by ten memory and nine special function indicators show operating status at a glance.

144 146MHz - 20/12.5 KHz
Supply: 8.0 - 15VDC
IP's: 10.7 - 0.450 MHz
Selectivity: 2.75 KHz @ -6dB (2.15K)
